Core Theoretical Texts in World Politics

A solid grasp of theory is essential for analyzing world politics critically. The following texts are seminal in establishing the major paradigms:

1. "Politics Among Nations" by Hans J. Morgenthau

Often regarded as the foundational text of classical realism, Morgenthau's work emphasizes power politics, national interest, and the enduring nature of conflict among states. It introduces the idea that international politics is a struggle for power and security, concepts still relevant in contemporary geopolitics.

1. "Theory of International Politics" by Kenneth Waltz

Waltz's neorealism (or structural realism) reshapes understanding of international relations by focusing on the anarchic structure of the international system rather than human nature. His work explains the balance of power and state behavior through systemic constraints.

This collection explores liberal theories, emphasizing international institutions, democracy, and economic interdependence as pathways to peace. Doyle also critically examines the critiques of liberalism, providing a balanced

Influential Classic and Contemporary Works

A leading realist perspective, Mearsheimer argues that great powers are inherently driven to maximize their influence, leading to inevitable conflicts. His emphasis on offensive realism offers a stark view of international power struggles.

Keohane's work is pivotal in understanding how institutions like

the UN, WTO, and NATO influence state behavior, promoting cooperation in an anarchic system.
