- Purpose: Rapid weight loss to motivate and accelerate fat burning.
- Duration: Typically lasts 2 to 7 days, depending on individual goals and starting weight.
- Focus: Pure protein intake with no fats, carbs, or vegetables initially.
- Outcome: Depletion of glycogen stores, leading to ketosis and quick fat loss. This phase sets the tone for the rest of the diet, emphasizing discipline and focus on lean proteins.

Core Principles of the Attack Phase Food List

The food list during the Attack Phase is highly restrictive but specific. It emphasizes lean, high-quality proteins while excluding fats, carbs, and most other food groups. The following principles guide the selection:

- Lean proteins only: Poultry, fish, shellfish, lean meats, eggs, and low-fat dairy.
- No added fats: No oils, butter, or processed foods containing fats.
- No vegetables, fruits, or grains: These are introduced later in subsequent phases.
- Portion control: While the focus is on

protein, moderation is still key. The goal is to induce ketosis rapidly, prompting the body to burn stored fat for energy.
