Before diving into the specific codes, it's important to understand what they are and how they function. The ONN universal remote is designed to work with multiple electronic devices by using pre-programmed codes. These codes are unique identifiers assigned to different brands and models of devices, allowing the remote to communicate correctly with each device.

What Are Device Codes?

Device codes are numerical sequences that the remote uses to identify and control various electronics. Each device type—TV, DVD, Blu-ray, soundbar, streaming device, etc.—has a set of compatible codes. When you program your remote, you select the device type and input the corresponding code, enabling the remote to send the correct signals to your device.

Why Are Codes Important?

Having the correct code ensures that your remote can: - Power on/off the device - Change channels or inputs - Adjust volume - Control playback functions - Access device menus Incorrect or incompatible codes may result in limited or no control over your devices.
