Sample Intermediate Financial Accounting Exam Questions and Answers

Below are representative questions with detailed solutions designed to prepare students for typical exam challenges.

Question 1: Revenue Recognition

Q: A company signs a contract to deliver goods worth \$50,000 with payment due upon delivery. The company delivers the goods on December 15, but the customer pays on January 10 of the following year. How should the company recognize revenue in its financial statements? Explain. A: According to revenue recognition standards (e.g., IFRS 15 or ASC 606), revenue should be recognized when control of the goods transfers to the customer, typically at delivery. Since delivery occurred on December 15, the company should recognize the revenue of \$50,000 in the financial statements for the year ending December 31. Key Points: - Revenue recognized when control transfers, not necessarily when cash is received. - The receivable is recorded on December 15, reflecting the amount owed. - Cash receipt on January 10 affects cash flow but not revenue recognition.

Question 2: Inventory Valuation Methods

Q: A company uses the FIFO method for inventory valuation. Beginning inventory was 1,000 units at \$10 each. During the year, 5,000 units were purchased at \$12 each, and 4,000 units were sold. Calculate the ending inventory value. A: 1. Determine the units remaining: Beginning inventory: 1,000 units Purchases: 5,000 units Units sold: 4,000 units Remaining units: Total units available: $1,000 + 5,000 = 6,000$ Units sold: 4,000 Ending inventory units: $6,000 - 4,000 = 2,000$ units 2. Apply FIFO methodology: - First, sell the oldest inventory (at \$10), then the newer (at \$12). - Inventory remaining comprises: - 1,000 units from beginning inventory at \$10 (all sold, so none remain) - 4,000 units purchased at \$12 (since only 4,000 units were sold, remaining are 1,000 units purchased at \$12) - Ending inventory: - 1,000 units at \$12 (from recent purchase) - 1,000 units at \$12 (from purchase, since total units remaining are 2,000 at \$12) 3. Calculate ending inventory value: Ending inventory units: 2,000 units at \$12 = $2,000 \times \$12 = \$24,000$

Question 3: Property, Plant, and Equipment (PPE) Depreciation

Q: A company purchases machinery costing \$100,000 with an estimated useful life of 10 years and a residual value of \$10,000. Using the straight-line method, calculate the annual depreciation expense. Additionally, explain what adjustments are needed if the machinery's useful life is revised to 8 years. A: 1. Initial depreciation calculation: Depreciable amount = Cost - Residual value = \$100,000 - \$10,000 = \$90,000 Annual depreciation expense = Depreciable amount / Useful life = \$90,000 / 10 = \$9,000 2. Adjustment for revised useful life: If the useful life is revised to 8 years, remaining useful life (assuming the machinery was purchased at the start of the period) is now 8 years. - Total depreciation over the new useful life: Remaining depreciation at the time of revision needs to be recalculated. Suppose no depreciation has been charged yet: Remaining depreciable amount = \$90,000 (assuming no change in residual value). - New annual depreciation expense = \$90,000 / 8 = \$11,250 - If some depreciation was already charged, adjust the carrying amount and residual value accordingly, and then allocate depreciation over the remaining useful life.

Question 4: Accounting for Intangible Assets

Q: A company develops an internally generated patent at a cost of \$200,000. According to accounting standards, can this development cost be capitalized? Justify your answer and explain the recognition criteria. A: Generally, research and development costs for internally generated intangible assets like patents are expensed as incurred until certain criteria are met. Development costs can be capitalized only if: - The technical feasibility of completing the asset for sale or use has been established. - The company intends to complete the asset and use or sell it. - The company has the ability to use or sell the asset. - The asset will generate probable future economic benefits. - Adequate technical, financial, and other resources are available to complete the development. - The expenditure attributable to the asset during its development can be reliably measured. In this case: - Since the patent is internally developed, the costs incurred during development may be capitalized only if the above criteria are satisfied. - If these criteria are not met, the \$200,000 development cost should be expensed. Conclusion: - Unless the company can demonstrate all the criteria, the development costs should be recognized as expenses in the period incurred.

Question 5: Financial Statement Analysis - Ratio Calculation

Q: A company's financial statements show a net income of \$150,000, total assets of \$1,000,000, and shareholders' equity of \$600,000. Calculate the return on assets (ROA) and return on equity (ROE). A: - Return on Assets (ROA): $ROA = \text{Net Income} / \text{Total Assets}$ $ROA = \$150,000 / \$1,000,000 = 15\%$ - Return on Equity (ROE): $ROE = \text{Net Income} / \text{Shareholders' Equity}$ $ROE = \$150,000 / \$600,000 = 25\%$ Interpretation: - The company generates a 15% return on its assets, indicating efficiency. - The 25% ROE reflects profitability relative to shareholders' equity, showing strong performance.

Sample Exam Questions with Detailed Answers

To illustrate the application of these concepts, let's analyze some typical exam questions and their comprehensive solutions.

Question 1: Revenue Recognition under IFRS 15

A company sells a product to a customer with a sales price of \$100,000. The contract includes a two-year warranty, which the customer can purchase separately. The company determines that the standalone selling price of the product is \$90,000, and the warranty's standalone price is \$10,000. Revenue is recognized over time as the performance obligations are satisfied.

Required: a) Identify the performance obligations. b) Calculate the amount of revenue to be recognized for the product and the warranty in the first year. Answer: a) Performance obligations: - Delivery of the product - Warranty service (extended warranty) b) Revenue allocation: Total transaction price = \$100,000 - To allocate the transaction price, determine the relative standalone selling prices: - Product: \$90,000 - Warranty: \$10,000 - Proportion of total for each: - Product: $\$90,000 / \$100,000 = 90\%$ - Warranty: $\$10,000 / \$100,000 = 10\%$ - Revenue allocated: - Product: $\$100,000 \times 90\% = \$90,000$ - Warranty: $\$100,000 \times 10\% = \$10,000$ Recognition in the first year: - The product revenue is recognized when control transfers, which may occur at delivery. - The warranty revenue is recognized over the warranty period, typically evenly over two years: - Year 1 warranty revenue = $\$10,000 / 2 = \$5,000$ Summary: - Recognize \$90,000 upon delivery of the product (assuming control transfers immediately). - Recognize \$5,000 as warranty revenue in year 1, with the remaining \$5,000 in year 2.

Question 2: Lease Classification and Journal Entries

A company signs a 5-year lease for equipment with annual payments of \$20,000. The equipment has an estimated useful life of 8 years, and the present value of lease payments is \$85,000. The company's incremental borrowing rate is 6%. Required: a) Classify the lease as either a finance lease or operating lease. b) Prepare the initial journal entries for the lease at inception. Answer: a) Lease classification: Under IFRS 16, most leases are recognized as a right-of-use asset and lease liability. However, if the lease term is less than 75% of the asset's useful life or other specific criteria, it might be an operating lease under previous standards. - Here, the lease term is 5 years, and the useful life is 8 years. - Lease term percentage = $5/8 = 62.5\%$, which is less than 75%. - Given this, the lease could be classified as a finance lease under old standards, but IFRS 16 requires recognition of a right-of-use asset and liability for almost all leases, unless exemptions apply. - Assuming IFRS 16 applies, the lease is recognized as a right-of-use asset and lease liability. b) Initial journal entries: Calculate the present value of lease payments (already given as \$85,000). - Dr. Right-of-Use Asset: \$85,000 - Cr. Lease Liability: \$85,000 Entry at inception: Dr. Right-of-Use Asset \$85,000 Cr. Lease Liability \$85,000 Subsequent entries would include interest expense and depreciation over the lease term.

Most people do not set out with the intention of downloading a book. Usually, it starts with a small need. A question that lingers longer than expected, a topic that keeps appearing in conversations, or a moment when surface-level information simply is not enough. That is often when **Intermediate Financial Accounting Exam Questions And Answers** enters the

picture.

At first, the goal might be modest. Read a chapter. Find one useful explanation. Move on. But having the book available in PDF format quietly changes that intention. There is no rush to finish, no pressure to read everything at once. The book sits there, ready, waiting for attention.

Reading begins to happen in fragments. A few pages in the morning while the day is still quiet. A bookmarked section checked again in the afternoon. A highlighted paragraph revisited at night because it suddenly makes more sense. These moments do not feel like formal study. They feel natural.

The layout remains familiar every time the file is opened. Pages look the same, headings stay where they were, and visual cues help the mind remember. Over time, readers stop searching and start navigating instinctively.

Notes appear almost without effort. A sentence stands out, so it gets highlighted. A thought forms, so it gets written in the margin. Weeks later, those notes feel like messages left behind by an earlier version of the reader.

Search tools quietly save time. Instead of flipping through pages or scrolling endlessly, one keyword brings clarity. It turns the book into something useful long after the first read.

There is also a sense of relief in knowing the source is trustworthy. When a book comes from a reliable platform, attention stays on understanding, not on questioning accuracy or safety.

For students, this kind of access feels stabilizing. Materials are always there, even when schedules are chaotic. Studying becomes less about urgency and more about familiarity.

Professionals experience it differently. Certain sections become references. Others gain meaning only after real-world experience catches up. The book grows alongside the reader.

Independent learners often appreciate the absence of structure. There is no deadline, no checklist. Progress happens when curiosity returns, not when it is demanded.

Accessibility options quietly matter. Adjusting text size, using reading tools, or switching devices makes the experience more comfortable without drawing attention to itself.

Files stay organized. Even after months, returning does not feel like starting over. The content feels known, not overwhelming.

What stands out over time is how the relationship changes. **Intermediate Financial Accounting Exam Questions And Answers** stops feeling like a file that was downloaded. It becomes something familiar, something useful in quiet ways.

Sometimes, a passage read long ago suddenly feels relevant. A concept that once seemed abstract now makes sense. Growth shows itself in these small moments.

Reading no longer feels like an obligation. It becomes something to return to when clarity is needed or curiosity resurfaces.

In this way, learning slips into everyday life without announcement. The book does not demand attention. It simply remains available.

And often, that quiet availability is what makes it valuable. Knowledge does not have to be chased when it is already close at hand.
